

First things first, let's make sure you have printed this guide to scale.

When printing, make sure you print on a full A4 size page and that it's scaled to 100%.

You can check that the Ring Size Chart has been printed at the right size by placing a credit card on the shape above, which should be the same size.

Next, find a ring that sits comfortably on your chosen finger and is like the one you want to purchase. Then you're all set, place the ring over the sizes on the chart to find the ring size you need.
